

Tour 8 - Monsanto

Tour Host - Martha Ebbesmeyer

ADM River Terminal

1 E Grand Ave
St Louis, MO 63147
www.adm.com

ADM Terminal Services has an extensive offering of services designed to meet the specific needs of domestic and import/export- oriented customers. Services include transloading, terminaling, warehousing, and a full array of logistical functions. ADM Terminal Services is strategically located on major inland waterways, rail lines, and coastal locations, all of which provide excellent transload points to the industrial corridors or trucking lanes of your choice, allowing immediate access to your key markets. Location options include facilities which are already designed for rapid unload, secure storage and timely distribution, in addition to sites ready for development.

Hummert International

4500 Earth City Expressway
Earth City, MO 63045
www.hummert.com

Hummert International is a commercial distributor of horticultural supplies and equipment. Hummert International's headquarters in Earth City, Missouri consists of offices, a 10,000 sq. ft. showroom, warehouses and a 3,400 sq. ft. display greenhouse - all under one roof.

Creve Coeur Park - Lunch

Enjoy lunch catered by Bandana's and enjoy the beautiful scenery. Creve Coeur Lake Memorial Park is the largest unit of the St. Louis County Parks System at 1,917 acres. This area includes the remnants of a Missouri River oxbow lake/wetland, has over 200 acres of wetland pools and shrub marsh and nearly 300 acres of wet prairie and early successional bottomland forest.

Bandana's tradition began in September of 1996 when our first Bandana's BAR-B-Q opened in Arnold, Missouri. Our mission remains the same, to provide the best Southern Style BAR-B-Q, with exceptional quick service, in a friendly, family atmosphere. Our real wood pit smokers operate 24 hours a day, which is why you can "SMELL THAT SMOKE" every time you come to Bandana's BAR-B-Q.

Monsanto Chesterfield Village Research Center

700 Chesterfield Pkwy W
Chesterfield, MO 63017
www.biotechknowledge.monsanto.com

The Monsanto Tour Program has been sharing information about Monsanto and its agricultural biotechnology efforts for more than a decade. Visitors to Chesterfield Village learn about Monsanto's commitment to agriculture as well as the technical aspects, benefits and opportunities of plant biotechnology. Top researchers from around the world are developing insect-protected plants, herbicide-tolerant plants and high-yielding plants that will tolerate environmental stress to achieve sustainable agriculture and the vision of abundant food and a healthy environment. The walking portion of the tour showcases our laboratories, robotic systems, growth chambers and greenhouses.

Stemme Farms

110 High Valley Drive
Chesterfield, MO
www.agweb.com/FarmJournal/Article.aspx?id=145879

Explore an 1100 acre farm in urban St. Louis County to discuss biotech, urbanization and the blessings and challenges of the River! Warren Stemme, 4th generation farmer, farms land held by his family since 1869. Stemme is former President of both the St. Louis County Farm Bureau and the Missouri Soybean Association. He along with St. Louis County Farm Bureau leaders Val and Denny Mertz will host the group.
