

I tried to fire up the tractor to do some carpet farming this morning and it wouldn't start! I sure hope I can get it fixed!

I licked this applesauce container clean but I'm still hungry! I guess it's my lucky day, because look what I just found...

They say, "money doesn't  
grow on trees," but I  
heard toilet paper does! I  
wonder how many trees it  
took to make this roll...

We don't have popcorn at  
the North Pole, but I heard  
14 billion quarts of it are  
eaten each year in  
America. I just had to try  
some, but things got a  
little out of hand!

I needed a warm bath  
after rolling in corn  
starch, but my water  
keeps getting cold. It's  
okay for me to just leave  
the water running, right?

I couldn't bring any snow  
inside without it melting,  
so instead I made a snow  
angel in this cool product  
made from field corn!

I'm hungry for some  
garden-fresh vegetables,  
so I thought I would just  
grow some myself!

Did you know that Illinois  
is first in the country in  
pumpkin production?  
One delicious pie made  
with canned pumpkin  
from Morton, Illinois,  
coming right up!

Just driving around in my  
car filled with corn and  
soybean products! Do you  
think the police will  
accept my North Pole  
driver's license?

Don't mind me, just  
practicing my climbing!  
Hey, how old do you think  
this tree is?  
Older than you?

Inside this ball of yarn  
was a clue for what yarn  
is made of. Follow the  
trail to find me and see  
for yourself!

I got thirsty and found  
this soda in the fridge. It  
must be healthy for me,  
because the second  
ingredient is corn!

Pile it high and watch it  
fly! Remember those  
vegetables I planted? Now  
You can enjoy the fruits  
of my labor!

It's garbage day! Now if  
only I could figure out  
which of these things I  
can recycle...

You know what else my  
omelet needs? Bacon.  
Bacon is always the  
answer.

It's a good thing chickens  
lay about 300 eggs a  
year, because I could eat  
omelets for breakfast  
every day!

Just making my favorite  
roasty-toasty campfire  
treat! I wonder what  
marshmallows are even  
made of...

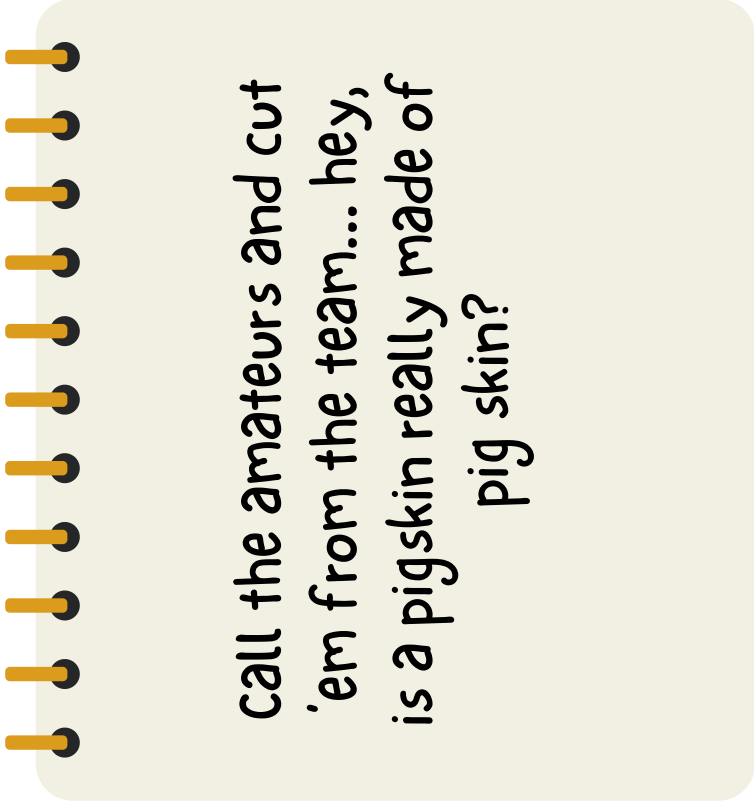

The honey I just  
harvested from this  
beehive is so delicious, it's  
un-bee-lievable!

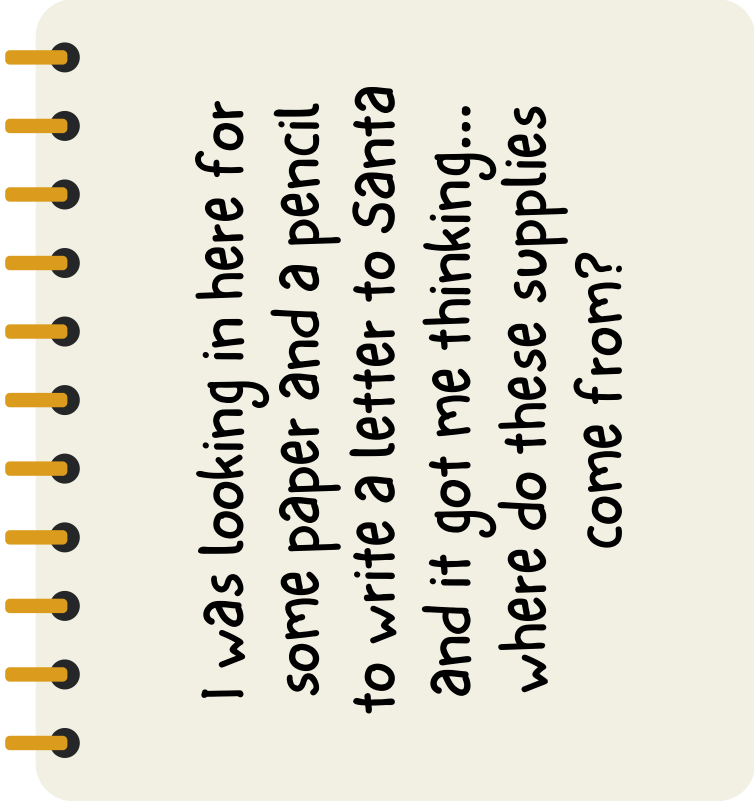

I've had so much fun with  
you this holiday season  
and I can't wait to see you  
again next year! Until  
then... want to play a  
game?

Milking a cow sure is  
tiring... thank goodness  
for new milking  
technology that lets me  
have dairy products  
without the sore hands!

A graphic of a spiral-bound notebook with a light beige cover and a yellow spiral binding on the left side. The text is written on the right page.

call the amateurs and cut  
'em from the team... hey,  
is a pigskin really made of  
pig skin?

A graphic of a spiral-bound notebook with a light beige cover and a yellow spiral binding on the left side. The text is written on the right page.

I was looking in here for  
some paper and a pencil  
to write a letter to Santa  
and it got me thinking...  
where do these supplies  
come from?

Nothing to see here, just  
practicing my layups.

Next stop: March  
Madness and cutting  
down this net!

Hello up there! I was  
trying to grill some  
burgers for dinner, but  
when I flipped the patty,  
the patty flipped me  
instead! Help!

I threw some of my food  
scraps into this dirt and  
they disappeared! Where  
could they have gone?!
